Hidria

Fans catalogue

General data

Motors for fans are thermally protected - F or B insulation class and with internal protection IP54, IP44 and IP56.

Maintenance free ball bearings, suitable for min ambient temperature of -30 °C are mounted (special ones for different conditions are available on request). Life time expectancy L10 for bearings is at least 40.000h and depends on ambient temperature and application conditions.

Air performance

Air performance of fans is measured according to ISO 5801-1997 with the fan measured on its sucking side. The results are valid for an air density of $\rho = 1,2\text{kg/m}^3$ at 20 °C. Under another conditions, values can be different.

Speed controllers

Under agreed conditions, fans are suitable for operating with speed controllers by voltage reduction (autotransformer, triac) or by voltage/frequency reduction (frequency converter).

If the speed control is applied, increased temperature-rise and noise may be expected and has to be reviewed in the final application. Also EMC requirements must be achieved in the final application and the manufacturer or user of control unit is responsible for it.

In order to assure the best performance of our fans controlled with PWM Frequency Converter, it is highly recommended to use the "Sine Wave Filter" on converter output with right settings of PWM Frequency Converter.

With right settings of controller parameters regarding "Torque characteristics" or "Voltage / Frequency characteristics" can be reduced electrical current at low RPM's, can be reduced heating of the motor at low RPM's and also saving energy.

If the shielded cable is to be used, both ends of cable shield must be grounded.

Using of ferrite ring at the ends of connection cable additionally reduce the current in ground conductor which reduce RF disturbances.

In the catalogue are our standard products.

Custom design and modifications are available on request.

Accessories as guard grills, wall plates, can be delivered assembled or separately.

Additional information: drawings, test reports, special data, approvals etc. is available on request.

We keep rights to make any dimensional and design changes due to our improvement process.

Typical features of the Hidria EC-motor fan

- High efficiency throughout the entire speed range.
- Speed setting via linear voltage input (0-10V) or PWM signal.
- Two analog inputs for easy closed loop control (PID regulator build-in).
- Both analog inputs can be used as digital inputs.
- Multifunction digital output (open collector) for tach-out, alarm signal or slave control. Tach-out signal can be 1, 2, 3, 4, 6 or 12 pulses per revolution.
- Analog input adjustment to fit customer's sensor.
- All adjustments can be made with a PC or can be factory presetted.
- Low-noise operation across the entire speed range.
- Integrated EMC filter.

All features are available on request.

The standard version of an EC-motor fan has:

- One analog input (0-10V or PWM input).
- Sensor power supply 10VDC (max 30mA)
- Tach-out signal (OC) (default: 1 pulse per revolution)

Example of type key for Axial fans with EC motor

R09R-3530HS-ECM-4200

R09	External rotor motor type
R	Acessory type (E-without guard grill, R-with guard grill, P-with guard grill and wall plate)
35	Fan diameter x 10 (exact diameters are stated in drawings)
30H	HEF blade angle
S	Airflow direction (S-sucking, B-blowing)
EC	Fan with EC motor
M	Electrical connection (M-single phase; T-three phase)
42	Motor stack height
00	Combination of motor/electronics/software

Example of type key for Axial fans with Integrated Frequency Converter

R13R-6330HA-I6M-7057

R13	External rotor motor type
R	Acessory type (E-without guard grill, R-with guard grill, P-with guard grill and wall plate)
63	Fan diameter x 10 (exact diameters are stated in drawings)
30H	HEF blade angle
S	Airflow direction (S-sucking, B-blowing)
I	Fan with Inverter drive
6	Number of poles
M	Number of phases (M-single phase, T-three phase)
70	Motor stack height
57	Electrical design

Example of type key for Centrifugal Fans

R09T-1945D-2M2-1511

R09	External rotor motor type
T	Blade type (T-backward curved, C-forward curved)
19	Fan diameter x 10 (exact diameters are stated in drawings)
45	Blade width
D	Direction of rotation
2	Number of poles
M	Number of phases (M-single phase, T-three phase)
2	Number of speeds
42	Motor stack height
11	Electrical design

Centrifugal Fans
